Our Vision

Celebration strives to offer a range of plastic food & drink packaging which is practical yet sustainable.

The launch of the Plastic Packaging Tax UK ("PPT" introduced April 2022) and various other bans on single-use plastics, means that we are developing our range to comply.

We are focussed on introducing packaging made from recycled PET (rPET) with a minimum 30% post consumer recycled resin to avoid the PPT. Our current offering includes recycled plastic cold drink cups, snap on platters with lids, salad bowls and salad containers with hinged lids.

Plastic Packaging Tax EXEMPT

1 rPET 30%

Our clear rPET, PET (virgin resin) and PP items are considered widely recyclable throughout the UK. Used packaging should be rinsed clean and free from food or drink waste before adding to recycling collections.

Another sustainable solution is reusable packaging. Our Versa2Go®microwavable containers and hinged lid portion containers – are made from sturdy polypropylene (PP) and can be reused many times over.

Reusable many times over REDUCE

When reusing packaging, always ensure the products are clean and free from wear or damage.

Sourcing

Can't find what you're looking for? With extensive industry expertise, Celebration offers a wide range of packaging solutions tailored to our customers' needs. Subject to minimum order requirements, we're committed to helping you secure the perfect packaging for your application.

Custom Printing

Celebration

Pint & Half Pint to brim PP Cups

New pint & half pint PP plastic disposable cups – perfect for the fast-paced demands of bars, events, and festivals. These fill to the brim cups are approved for serving draught alcohol across England, Scotland, and Wales with the UKCA (UK Conformity Assessed) mark stamped on the base. Also certified for Northern Ireland under the UKNI mark, meaning they comply with UK weights and measures legislation for complete peace of mind.

Widely recyclable after use.

Tamper Evident PP Food Containers & Lids

Made from durable polypropylene, these tamper proof containers are ideal for retailing deli foods or even chilled, fresh soup. Once the lid is secured to the container, a security tab must be broken to remove the lid. After the tab has been broken, the lid can still be refitted to help maintain freshness of the food inside.

Available in many sizes and styles, including round pails with white plastic handles.

White PE Lined Paper Pots & PP Lids

Our 4oz and 7oz paper portion pots are perfect for takeaway businesses serving sides and sauces, such as gravy, mushy peas, baked beans or curry sauce.

Developed as a direct replacement for EPS foam portion pots traditionally used in UK fish & chip shops, prior to the October 2023 ban on single-use plastic packaging.

Suitable for hot or cold foods.

Kraft Food Bowls & Lids

Following the success of our EnviroWare® PLA-lined kraft salad bowls, our best-selling 750ml size just got an upgrade in value. Now featuring a PP (polypropylene) lining, delivering the same high-quality performance, at a lower price.

Suitable for both hot and cold applications, with two lid types: clear recyclable PET lids for merchandising cold foods and matching vented Kraft lids designed to release steam and preserve the texture of hot takeaway meals.

Ripple Paper Hot Drink Cups & Lids

Ripple paper hot drink cups provide optimum heat insulation due to their corrugated outer layer. The benefits include increased hand comfort, enhanced grip, and keeping drinks hot for longer. Ripple cups are made from paperboard with a PE plastic moisture barrier to prevent leaks.

PS Plastic sipper lids and EnviroWare® bagasse or CPLA sipper lids are available separately.

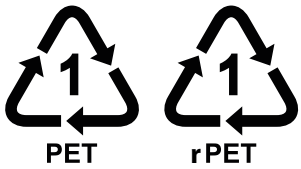
Material / resin identification codes



Polyethylene Terephthalate or PET is the most commonly used plastic. Much of our plastic packaging for cold foods is made from PET. It is strong, lightweight and shatterproof.

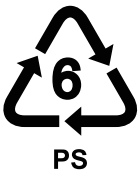
PET is easily recycled and can be made with recycled content (rPET).

Polypropylene is the second most commonly used plastic. It is highly versatile with a wide temperature tolerence, making it suitable for microwave heating or freezing foods.

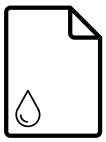
PP is easily recycled.

Packaging made from PP can often be reused; for example Versa2Go® food containers and our reusable portion containers with hinged lids can be reused many times over.

Our Clearview Mealmaster microwavable containers (bases only) are made from a mix of polypropylene with added minerals. This results in 20 to 50% less plastic, which helps reduce landfill waste.



Unfortunately Polystyrene PS is not commonly recycled in the UK, although some councils accept it at household waste recycling centres.



Paper packaging is often coated with a thin plastic film, providing a moisture and grease resistant barrier.

Packaging made from this material is suitable for hot or cold foods.

PE lined paper is suitable for hot foods up to 80°C. PP lined paper withstands higher temperatures up to 120°C, making it suitable for microwave reheating.
