EnviroWare®

Takeaway food packaging
from natural, sustainable
& renewable resources

Celebration
www.celebration.co.uk

Our Natural Materials

Plant Starch PLA

Manufactured by NatureWorks LLC, Ingeo PLA (Polylactic Acid) is a plant based biopolymer, made using simple plant starch; from abundant feedstocks such as corn. The end result is a PLA product which performs comparatively to those made from traditional petrochemical based plastics. Suitable for cold / ambient food & drinks up to 40°C.

Products include:
Cold Drink Cups & Lids
Combination Pots & Lids
Deli / Salad Containers & Lids
Portion Pots & Lids

Paper

Paper is a versatile material and especially appealing when it comes from sustainable FSC® (Forest Stewardship Council®) certified sources. We now have a wide range of paper products in white or kraft coloured FSC® paper.

Products include:
Paper Hot Drink Cups
Paper Food Containers
Kraft Paper Food Trays
Naturals Heavyweight Plates
Paper Portion Pots
Paper Cutlery
Paper Straws

Bamboo

Bamboo is one of the world's fastest growing woody plants, growing as quickly as 2 feet per day. It can be harvested much faster and more frequently compared to hardwood trees. Making bamboo fibre a highly sustainable substitute for wood-based paper.

Our Bamboo fibre products are certified by FSC® (Forest Stewardship Council).

Products include:
Bamboo Fibre Double Wall Cups

Bagasse

Bagasse is made from natural non-wood fibres, deriving from fast growing plants such as sugarcane.

Products include:
Hot Cup Lids
Plates, Platters, Bowls & Trays
Hinged Food Boxes
Rectangular Food Containers
Portion Pots & Lids
Cutlery

Wood

Celebration are FSC® (Forest Stewardship Council®) certified and we ensure our wooden products are sourced from sustainable sources.

Products include:
Wooden Cutlery
Individually Wrapped Cutlery
4-in-1 Mealkits
Drinks Stirrers

Palm Leaves

Produced in India, Palm Leaf plates and platters are made from discarded leaves from the Adaka nut palm. The leaves are collected, cleaned and then mechanically pressed in a mould at 120°C; no additional treatments are required. Each individual item has its own unique pattern and structure.

Products include:
Plates, Platters & Bowls

Food & Drink packaging made from natural, sustainable & renewable resources

Celebration launched the EnviroWare® range in 2007 as a solution for customers wanting sustainable takeaway packaging. EnviroWare® food & drink packaging is made from natural raw materials. Once the packaging has been used, most can be commercially composted (meeting the EN13432 composting standard).

Celebration are members of the Foodservice Packaging Association and have BRCGS (British Retail Consortium), ISO 9001 quality management and ISO 14001 environmental management systems accreditations.
You can rest assured that we have the best possible products and processes in place.

Most of our paper and wooden products are FSC® (Forest Stewardship Council® C113967) certified, demonstrating our commitment to using sustainable materials, from a responsible source. Look out for FSC® certified products throughout the EnviroWare® brochure.

Please contact us for further information on our products and associated accreditations.

Certificate Number 14104
ISO 9001
ISO 14001

Our Environment : Less fossil fuels

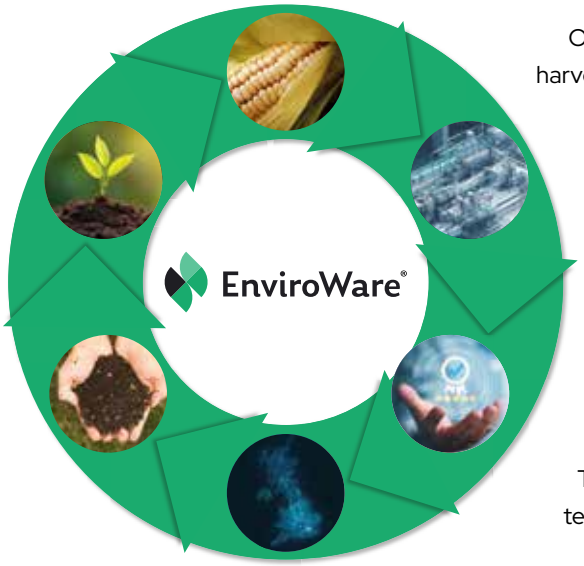
Oil is a finite resource, as such society is placing a greater importance on moving away from a dependency on traditional oil based plastic packaging. EnviroWare® foodservice disposables help to meet this need...

Packaging returned to the ground as compost

Commercial or home composting of EnviroWare® products, produces compost which can be used as a fertiliser for growing new plants and crops.

Disposal

Dependant on material and certification, disposal options for Enviroware® products include: Commercial or home composting, Incineration (with scope for energy recovery) and Recycling.



Raw Materials

Our process begins by growing and harvesting sustainable materials including sugarcane, corn and bamboo.

Manufacture

Celebrations manufacturing partners convert these plant-based materials into quality packaging products.

Certification

The packaging undergoes relevant testing to ensure it meets the highest standards.

Distribution

EnviroWare® packaging is marketed to the foodservice industry via our network of distribution partners throughout the UK & Europe.

What are PFAS?

Our latest EnviroWare® bagasse food boxes, offer high performance and are now certified PFAS free and suitable for home composting.

PFAS (per- and polyfluoroalkyl substances) are a man-made, "forever chemical" traditionally added to make bagasse and other types of food packaging water and grease resistant.

Packaging containing PFAS is food safe, the problem occurs when used packaging breaks down in the environment.

PFAS chemicals will not naturally degrade and can end up contaminating groundwater for a very long time. Studies show that very high concentrations may pose health risks.

Benefits of PFAS free packaging

- Better for the environment
- Better for our health
- Free from forever chemicals
- Certified home compostable
- Suitable for hot or cold foods

Leakproof Bagasse Rectangular Containers & Lids

Available in four sizes with one lid to fit all. Bagasse rectangular food containers and lids provide an eco-friendly solution for packaging takeaway meals.

Snap fit lids create a virtually leakproof seal to help prevent sauces from escaping.

Bagasse containers and lids are designed to be stackable and suitable for microwave reheating (loosen lid before microwave reheating).

"Naturals" Heavyweight Plates

Naturals Plates are crafted from heavyweight 3-ply unbleached corrugated paperboard, delivering exceptional strength and durability that outperforms regular paper plates.

A water-based, food-grade coating provides reliable grease and moisture resistance, ensuring the plates stay sturdy even with saucy or oily foods.

Ideal for buffets, parties, and events, Naturals Plates combine eco-conscious design with superior performance.

Bagasse Plates, Platters & Bowls

Our bagasse dinnerware range is white / cream in colour. A great alternative to traditional paper plates and bowls, with bagasse generally being stronger and more rigid by comparison.

These products are suitable for use with hot, ambient and cold foods and can be used in a microwave.

Recyclable* PET clear plastic covers and lids are available to fit some items.

This range is free from PFAS forever chemicals and is certified Home Compostable by TÜV.

Bagasse Cutlery

Bagasse knives, forks and spoons, are a sustainable alternative to plastic single-use cutlery. Made from bagasse, non-wood fibres from sources such as sugarcane.
Natural bagasse cutlery is strong and sturdy - the fork having strong tines, the knife a serrated blade and all items have reinforced handles.

4-in-1 meal kits are available containing a knife, fork, spoon and a 30 x 20cm 2-ply kraft tissue napkin.
New ramen spoons are perfect for liquid based foods such as ramen, soup, stew and broth.
This range is free from PFAS forever chemicals and is certified Home Compostable by TÜV.

Paper Cutlery

Enviroware® Paper Cutlery is made from sustainable FSC® certified paperboard and is certified commercially compostable to DIN EN 13432:2000-12 standards. An environmentally responsible alternative to traditional disposable cutlery, it combines sustainability with excellent performance.

Its smooth, uniform finish, provides a superior dining experience. Despite being made from paper, it is remarkably strong and sturdy, making paper cutlery suitable for a wide range of hot or cold food applications.

The range includes knives, forks and spoons in two lengths, together with paper ice cream spoons.

Wooden Cutlery Dispensers

Zero-touch, single-use cutlery dispensers provide an ideal blend of hygiene, convenience, and sustainability.

Users have no contact with the cutlery when filling or using the dispenser, which helps prevent cross-contamination. There are no levers or buttons to push; users simply pull the cutlery handle from the dispenser.

These disposable cutlery dispensers help reduce waste, as customers only take what they need. Additionally, the dispensers are highly versatile, allowing customers to customise the unit by selecting any three cartridges to meet their cutlery needs.
